Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-20 are rejected under 35 U.S.C. 102(e) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Rogers et al (US 6391370) or Traska et al (US 6423363).

Rogers et al teach a composition comprising plant sterols, plant stanols, plant sterol esters and other non-toxic sterols in combination with an emulsifier (about 0.1 to about 25 percent), wherein the composition is used in foods including dairy products such a yogurt (see entire patent, especially column 3, lines 44-45; column 4, lines 45-48; column 11, lines 22-31; and Example 5).

Traska et al teach a composition comprising phytosterols in combination with an emulsifier and phytosterol esters, wherein the composition is used in foods including dairy products such a yogurt (see entire patent, especially column 4, lines 19-22 and the claims).

The claims appear to differ as to the recitation of specific esters of phytosterols and phytostanols.

The prior art teaches all esters where the claimed esters would be no more than inherent and or obvious to that of the prior art.

Applicant's arguments filed August 30, 2006 have been fully considered but they are not persuasive.

Applicant argues that the prior art does not teach plant sterol esters as creaminess enhancers.

Both Rogers et al and Traska et al teach the use of plant sterol esters in foods including dairy products as is claimed. Rogers et al teaches a smoother mouthfeel and texture (see column 10, lines 24-28 and 55-58). Certainly, a smoother mouthfeel has enhances creaminess. The prior art teaches the claimed invention. In the absence of a showing of unexpected results, Applicant has not shown how the claimed invention differs from that of the prior art.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
